

Toronto Area Abortion Services
(source: hasslefreeclinic.org June 2006)

The clinics listed below are strictly confidential and require **no** parental consent. Services at abortion clinics are covered by OHIP. All the clinics will see women without health cards but depending on the number of weeks pregnant you are will determine the cost. Only one appointment is usually needed unless the pregnancy is past 14 weeks. It is a good idea to have a check-up before the abortion to make sure there are no infections that need to be treated. You are awake during the procedure and will be offered pain medication. When you call the clinic to make your appointment, they will tell you what you need to do before the abortion.
